SUMMARY

Full Stack Engineer with 5+ years building software and 4+ years shipping production web and Generative AI products. Built the Generative AI platform that became Flexday AI's top-selling product, and an internal system now used by **20,000+ weekly active employees** at a **Fortune 500** client. Runs two live products alone outside work, including a Chrome extension at **15,000+ weekly active users** on subscription billing, owning the frontend, backend, payments, self-hosted infrastructure and customer support.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, HTML/CSS, Redux Toolkit, Tailwind CSS, Material UI, shadcn/ui

Backend: Node.js, Express.js, JavaScript, Python, Flask, FastAPI, REST API design, Microservices

AI / GenAI: RAG, OpenAI API, LLM integration, AI agents, embeddings, vector search, prompt engineering

Databases: PostgreSQL, MongoDB, SQL, schema design, Prisma/Drizzle ORM, vector databases

DevOps & Cloud: Docker, AWS, Azure, Hetzner, Coolify, self-hosting, CI/CD, Vercel, Git

Platforms: Chrome Extensions (MV3), Shopify Apps, authentication, payment gateways, subscription billing

PROFESSIONAL EXPERIENCE

Flexday AI (B2B SaaS and Services)

06/2022 - Present

Full Stack Engineer (AI Products), Remote, IN

- Delivered an internal platform end to end for a **Fortune 500** real estate client (React, Flask, MongoDB), from requirements through production rollout, now used by **20,000+ weekly active employees**.

Flexday AI Studio: Chat-driven platform for building AI apps with agents, cron jobs, flows, auth and database

- Designed and shipped the visual builder that lets non-technical users compose AI agents, scheduled cron jobs and multi-step flows through chat instead of code.
- Own the product surface end to end: run requirements sessions with users, design the interaction model, then build the React UI and the auth and managed-database modules behind it.

speciphicAsk: Generative AI platform for querying large enterprise document sets in natural language

- Built the company's top-selling product, contributing to an **80% revenue increase** and shipping to three enterprise clients across real estate, packaging and FMCG.
- Designed the RAG pipeline (chunking, embeddings, vector search) over 10,000+ document corpora on a Flask microservices backend, returning answers in **under 10 seconds**.
- Built the REST APIs and database layer joining the React client to the retrieval services, including schema design.
- Architected shared state across 100+ React components with Redux Toolkit, plus RBAC and a 10+ theme MUI/i18next system for white-label deployments.

Vamstar Pvt Ltd

12/2020 - 05/2022

Data Analyst II (Python / SQL engineering), Remote, IN

- Automated tender data collection across **20+ countries** in Python with Selenium and BeautifulSoup.
- Built SQL pipelines over PostgreSQL normalizing procurement data from 50+ countries into a consistent schema for analytics.

PRODUCTS (INDEPENDENTLY BUILT)

Side Notepad (Chrome extension) - Chrome Web Store

- Grew to **15,000+ weekly active users** at a **4.6+ star** rating, monetized through subscription billing.
- Run the whole stack alone: authentication, payment gateway, .docx export, self-hosted Docker deployment on Hetzner via Coolify, and every support request.

Clay Lock (B2B access-control app for Shopify) - Shopify App Store

- Built and published a B2B access-control app to the Shopify App Store: **400+ active installs**, **5.0 star** rating, top 6 in its category.
- Shipped merchant onboarding, B2B access rules, billing integration and support end to end.

EDUCATION

Indian Institute of Technology (IIT) Madras

05/2015 - 06/2020

Dual Degree (B.Tech + M.Tech), Civil Engineering, Chennai, IN
